STAR WARS

IMPERIAL ASSAULT

HONDO OHNAKA, FRIEND FOR HIRE

This pack provides the Hondo Ohnaka, Friend for Hire plastic figure that can be used when playing a mission. The other components in this expansion are incorporated as follows:

- Add the Deployment and Command cards to their supplies.
- If you own the *Tyrants of Lothal* expansion, the Imperial player can choose the "Ohnaka Gang" Agenda set when building their Agenda deck at the start of a campaign.
- Shuffle the Skirmish Mission cards into the Skirmish Mission deck. These cards use the "Lothal Spaceport" map (see below).

DEPLOYMENT CARD RESTRICTIONS

Some Deployment cards can be used in only one style of play in *Imperial Assault*. A Deployment card marked with a Campaign Deployment Icon (◔) can be used only in a campaign, while a Deployment card marked with a Skirmish Deployment Icon (✕) can be used only in a skirmish.

NEUTRAL DEPLOYMENT CARDS

Deployment cards with a Neutral Icon and card back do not belong to an affiliation. When creating an army for a skirmish, a player may choose to include Neutral Deployment cards as if they belonged to their affiliation. Neutral Deployment cards cannot be used in a campaign.

SKIRMISH ATTACHMENTS

Some skirmish upgrade Deployment cards list the word "Attachment" above their abilities. These cards can be attached to other Deployment cards as follows:

- When deploying units during skirmish setup, if a player has one or more "Attachment" cards included in their army, they place each of these cards on one of their non-upgrade Deployment cards.
- Each Deployment card can have only one "Attachment."
- Abilities on "Attachment" cards apply to all figures in the corresponding group.
- Many attachments require the group to have a specific trait, such as "*Trooper*." Attachments with these restrictions cannot be played on a group that does not have the trait.

When a group with an "Attachment" card is defeated, the opposing player scores VPs equal to the deployment cost of the "Attachment" card in addition to the VPs they score from the defeated group.

PAYING VPS

When an ability instructs a player to pay another player VPs, the paying player loses VPs and the paid player gains an equal number of VPs.

- If using an ability requires a player to pay more VPs than that player has, that player cannot use that ability.
- If a player's ability requires an opponent to pay more VPs than they have, that opponent pays all of their remaining VPs.

MISSION BRIEFING

You corner a surprised Hondo in his hideout just as he cracks open the crate. Spewing exaggerated apologies, the pirate agrees to give up the Imperial shipment. Hondo backs away just as an Imperial E-XD infiltrator droid bursts from the container.

- The Imperial mission token represents the E-XD Infiltrator Droid. The E-XD is an Imperial figure (Health: 5 plus twice the threat level, Defense: 1 black die, Attack: 2 red dice, +4 Accuracy, Speed: 3).
- As an activation, the Imperial player can activate the E-XD. (Track the E-XD infiltrator droid's state by flipping the token – Imperial: ready, Rebel: exhausted.)
- The door is locked. If the E-XD has been defeated, a figure can interact with the door (2 or) to open it. That figure may suffer 1 during that test to reroll any number of dice.
- The mission will progress when the door opens ().
- The mission ends at the end of Round 6 or when all heroes are wounded.

CALL FOR BACKUP

At the end of Round 2:

- Increase ⚙ by the threat level and resolve an optional deployment.

RUNAWAY DROID

When the E-XD is defeated:

The injured droid bounds through a door, hastily welding it behind him. If you can place a tracker on it, you can find out where it is taking its intel.

FOLLOW THE SOURCE

When the door opens:

- The blue deployment points are now active. The green deployment points are now inactive.
- Increase ⚙ by the threat level and resolve an optional deployment to the black point.
- Deploy the reserved Hondo Ohnaka to the red point.
- Apply additional Health to Hondo Ohnaka equal to twice the threat level.
- Put the E-XD into play on the yellow point.
- When an attack targeting the E-XD is declared, the Imperial player may spend 1⚙ to apply +2▼ to the defense results.
- When the E-XD would be defeated, it is incapacitated instead. When it is, it can no longer activate. A Rebel figure can interact with the incapacitated E-XD () to place a tracking beacon on it.
- The mission ends when the Rebels place a tracking beacon on the E-XD ().

END OF MISSION

When the tracking beacon is placed:

With the tracking device securely and secretly implanted, you make a good show of being "defeated" as you retreat. The data from that droid should prove extremely valuable to the Rebellion.

- Heroes receive 100 credits per hero.
- If playing an expanded mini campaign with *Tyrants of Lothal*, resolve the "Score Settled" Epilogue card.

At the end of Round 6 or when all heroes are wounded:

Unable to catch back up with Hondo or the mysterious Imperial droid, you are forced to retreat to the safety of your ship, left with only bad news to report.

- If playing this mission as a side mission, the Imperial player receives Hondo Ohnaka (Friend for Hire) as a villain.
- If playing an expanded mini campaign with *Tyrants of Lothal*, resolve the "Loose Ends" Epilogue card.

ADDITIONAL REWARDS

- Each player receives 1 XP. Heroes receive 100 credits per hero. The Imperial player receives 1 influence.
